

Guidelines for Decision-Making by the COBATEST Membership

The main decision-making body of the COBATEST Network is the COBATEST Steering Committee. In case the Steering Committee cannot reach a decision, voting by the members of the COBATEST Network shall be conducted. A decision is made with simple majority of the valid votes cast at a voting with a quorum of 50%+1 of the active¹ COBATEST members.

The Voting Process

The Members of the COBATEST Network shall vote on the decision anonymously either at a COBATEST Meeting or through an online platform.

The voting process is initiated by the Secretariat of the COBATEST Network, and COBATEST members are given a 3-week period to cast their votes on the decision.

¹ See COBATEST Membership Terms of Reference.
